

ASTRA CRM - Enterprise SaaS

Razorpay Integration End-to-End Audit Report

Generated Date: July 31, 2026 | Status: 100% VERIFIED & PASSED

Executive Summary

A comprehensive end-to-end audit of the Razorpay payment gateway integration was conducted across the frontend and backend architectures of the Astra CRM platform. All API endpoints, cryptographic signature verifications, client SDK initialization, subscription plan seat restrictions, and fallback test mode behaviors have been fully verified and are functioning in accordance with production SaaS standards.

Integration Audit Matrix

Component Layer	Verification Status	Technical Assessment & Details
1. HTML SDK Loader	[PASSED] VERIFIED & PASSED	Official Razorpay SDK (v1/checkout.js) loaded via CDN in index.html head.
2. Backend SDK Config	[PASSED] VERIFIED & PASSED	backend/config/razorpay.js initializes SDK with RAZORPAY_KEY_ID & SECRET.
3. Order Creation API	[PASSED] VERIFIED & PASSED	POST /api/payments/razorpay/order creates orders in paise (Rs. 3,000 / Rs. 5,000).
4. Signature Verify API	[PASSED] VERIFIED & PASSED	POST /api/payments/razorpay/verify validates HMAC SHA-256 & upgrades tenant.
5. Pricing Checkout UI	[PASSED] VERIFIED & PASSED	PricingPlansModal handles 15 seats (Rs. 3,000), 25 seats (Rs. 5,000) & Contact Us.
6. Env Key Lookup	[PASSED] VERIFIED & PASSED	Supports VITE_RAZORPAY_KEY_ID in .env for Vite client bundle loading.
7. Fallback Test Mode	[PASSED] VERIFIED & PASSED	Handles mock orders and test signatures for seamless UI demoing.
